Integrating SDGs in Regulatory Impact Assessment

2. Opportunities and Challenges

- | | |
|--|---|
| <ul style="list-style-type: none">- Strong institutional framework (IAcommittee, helpdesk, publicity, manual, online form, trainings)- Support from civil society- Support from public administrations- Integrated approach | <ul style="list-style-type: none">- Implementation gap- Ownership- Sanction mechanism- Accountability/Parliament- Administrative culture/routine- Implementation strategy- Filled out too late |
|--|---|

Integrating SDGs in Regulatory Impact Assessment

3. Improvements?

**For Sustainable Development :
how to**

- Integrate SDGs : all 17? 169 targets?
- Cope with International dimension (spill over, PCSD...)
- Saveguard integrated character : synergies and trade off's
- Assess impact (quali/quant, keywords, indicators...)

For RIA : how to

- Create political ownership?
- Keep it simple and broadly used but covering SD?
- Improve quality?
- Integrate in administrative routine at the inception phase (regulatory agenda) ?
- Focus scope on relevant areas?
- Foster cooperation/exchange of expertise between experts?

Integrating SDGs in Regulatory Impact Assessment

Thank you
